

ENGAGE™ TECHNOLOGY

The Engage App from Allegion

At FST we don't only have experience setting up the physical lock from Schlage, but in working the Engage app as well.

ENGAGE cloud-based web and mobile apps make it easy to configure lock settings, add users, and view audits and alerts from anywhere!

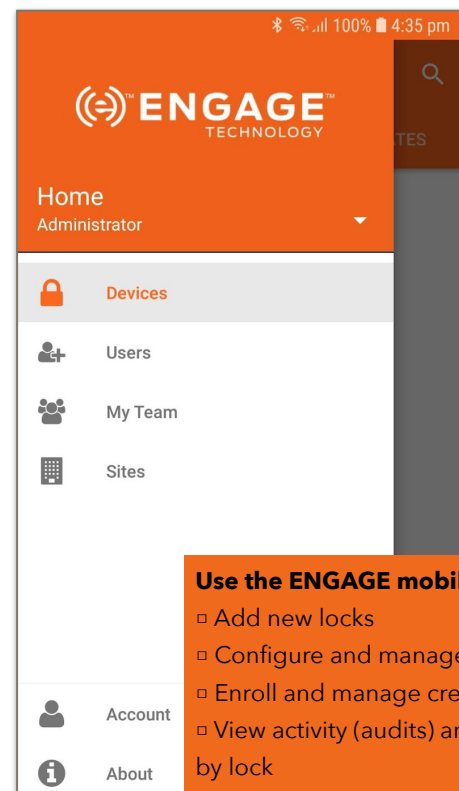

The Schlage NDE Series wireless lock with ENGAGE technology is designed to be easy to install, connect, manage, and use. Developed specifically for facilities that want to upgrade to electronic credentials for improved security and efficiency, it is ideal for interior office doors, common area doors, and sensitive storage spaces.

ENGAGE is not only easy to set up, it is extremely user friendly, helps give step by step instructions, as well as a direct line to customer service should a problem arise.

Solutions featuring ENGAGE technology can be customized to fit any size of business or budget and easily adapt to your growing or changing business needs.

Call FST for consultations about Access Control

As consultants, we can provide different options for your school/apartment/or other facility for its access control security.

Use the ENGAGE mobile app to:

- Add new locks
- Configure and manage locks
- Enroll and manage credentials
- View activity (audits) and alerts by lock
- Update door files and firmware
- Perform diagnostics
